SUMMARY

Computer Engineering graduate with internship experience in web development and IT support. Experienced in developing software using C#, JavaScript, SQL, HTML, CSS and React. Strong problem-solving skills with a passion for learning modern software development practices and contributing to collaborative development teams.

SKILLS

Programming Languages: C, C#, Java, Python, JavaScript, SQL

Backend & Databases: ASP.NET, REST API, OOP, MVC, Microsoft SQL Server, PostgreSQL

Frontend: HTML, CSS, JavaScript, React, Responsive Design

Tools & Version Control: Git, GitHub, Visual Studio, Visual Studio Code, Postman

EXPERIENCE

Web Developer Intern

DemiraySoft

Aug 2025 – Sept 2025

Kütahya, Turkey

- Developed responsive web pages using HTML, CSS, JavaScript and React.
- Contributed to the development of a Family Association Center Management System.
- Participated in the development of a Teknokent web project.
- Worked collaboratively with the development team on frontend improvements and content integration.
- **Used Technologies:** HTML, CSS, JavaScript, React, Git, GitHub

IT Support Intern

Enel Enerji

Aug 2024 – Sept 2024

Kütahya, Turkey

- Assisted in UPS diagnostics, motherboard repair and maintenance procedures.
- Performed firmware updates and hardware testing.
- Supported troubleshooting processes for electronic devices.
- Gained practical experience in hardware and software integration.
- **Used Technologies:** C (Embedded), UPS Systems, Motherboards, Firmware Update Tools, Diagnostic Equipment

EDUCATION

Kütahya Dumlupınar University

Bachelor of Science in Computer Engineering

2021 – 2026

Kütahya, Turkey

PROJECTS

Vehicle Rental Management System

C#, Microsoft SQL Server

- Developed a full-stack vehicle rental management application using C# and Microsoft SQL Server.
- Designed a normalized relational database for vehicles, customers and rental transactions.
- Implemented CRUD operations and rental management functionalities.
- **Used Technologies:** C#, Microsoft SQL Server, ADO.NET, OOP

Turkish Cyberbullying Detection System

Python, Scikit-learn, NLP

- Developed a machine learning model to classify Turkish cyberbullying content.
- Performed preprocessing including stemming, stopword removal and TF-IDF vectorization.
- Trained a Logistic Regression model achieving 85.39% classification accuracy.
- **Used Technologies:** Python, Scikit-learn, Pandas, NLTK, TF-IDF

Library Management System

Java, Spring Boot, MySQL

- Developed a Java-based library management system using the Spring Boot framework.
- Designed RESTful APIs for managing books, members and borrowing/return transactions.
- Built a normalized MySQL database schema and integrated it using Hibernate ORM.
- Wrote unit tests with JUnit and used Maven for dependency and build management.
- **Used Technologies:** Java, Spring Boot, Hibernate, MySQL, Maven, REST API, JUnit, Postman
